

# Danilo-Dragoslav Vuița

Backend Software Engineer (.NET / C#) | Timișoara, Romania | Remote

+40 750 494 448 | danilovuita@gmail.com | danilovuita.ro | github.com/danilovuita | linkedin.com/in/danilo-dragoslav-vuita

## Profile

Backend engineer with 5 years of .NET/C# experience building high-traffic services and REST APIs, including 4+ years on GoDaddy's domains platform serving millions of domains. MSc in Big Data (data mining, statistical analysis, scalable applications). Fully remote since 2022, comfortable working independently and asynchronously. Runs self-hosted Docker/Proxmox infrastructure and freelances on WordPress and API integration work through own company.

## Experience

### Software Development Engineer

Jul 2022 – Present

*GoDaddy*

*Remote, Romania*

- Built and maintained 12+ .NET/C# services and REST APIs for the domains platform, handling tens to hundreds of thousands of requests per day across millions of domains.
- Designed the REST API for an internal message-queue platform.
- Wrote and maintained unit and integration tests for every feature shipped.
- Worked across the stack, from API through the persistence layer (SQL), in a fully remote, distributed team.

*Technologies: .NET, C#, SQL, REST, GitHub, Postman, Jira*

### Freelance Developer (Owner)

Jul 2021 – Present

*ENNSDEV SRL*

*Remote*

- Deliver WordPress and WooCommerce projects for small-business clients, from setup to custom functionality.
- Built a custom WordPress booking plugin with two-way Google Calendar sync via the Google Calendar API.
- Handle client scoping, estimates, delivery and support end to end.

*Technologies: PHP, WordPress, WooCommerce, JavaScript, MySQL, REST APIs*

### Software Developer

Aug 2021 – Jul 2022

*Continental Automotive Romania*

*Timișoara*

- Developed and supported on-demand internal web applications in the Special Web Applications team.
- Fixed issues across application code and databases; published and deployed applications on IIS.
- Supported colleagues on database queries and project coordination.

*Technologies: C#, SQL, HTML, CSS, JavaScript, IIS, SVN, Jira*

### SAP Intern (FI-CO)

Jan 2020 – Jan 2021

*Continental Automotive Romania*

*Timișoara*

## Projects

### Self-hosted infrastructure | Proxmox, Docker, Linux

- Run a Proxmox homelab hosting containerized services with Docker, a reverse proxy, secure remote access, monitoring and backups.
- Used as the deployment target for personal and client projects.

## Technical Skills

|                            |                                                          |
|----------------------------|----------------------------------------------------------|
| <b>Programming:</b>        | C#, SQL, JavaScript/TypeScript, PHP                      |
| <b>Backend:</b>            | .NET, ASP.NET Core, Node.js, Express, REST API design    |
| <b>Frontend:</b>           | React, HTML, CSS                                         |
| <b>Databases:</b>          | SQL Server, PostgreSQL, MongoDB, MySQL                   |
| <b>DevOps &amp; tools:</b> | Docker, Proxmox, Linux, Git/GitHub, Postman, Jira, Agile |
| <b>Languages:</b>          | Romanian (native), English (C1), German (A1–A2)          |

## Education

### MSc, Big Data

2021 – 2024

*West University of Timișoara, Faculty of Mathematics and Computer Science*

*Timișoara*

- Data mining algorithms, statistical data analysis, big data technologies, scalable application design.

### Erasmus semester

Feb – Jun 2021

*Johannes Kepler University Linz*

*Linz, Austria*

- Cryptography, mobile web development, computer graphics, affective computing.

### BSc, Computer Science (English programme)

2018 – 2021

*West University of Timișoara, Faculty of Mathematics and Computer Science*

*Timișoara*
